PROFESSIONAL SUMMARY

6th-semester Software Engineering student (evening program) with the **Google Data Analytics Professional Certificate** and a background in administration. I have built end-to-end predictive models and data pipelines in Python and SQL, validated with statistical rigor on tens of thousands of records, and used conversion and sales metrics to drive decisions in my own e-commerce business. Motivated to turn data into clear KPIs and dashboards that support decision-making. Curious, structured and honest about what the data says.

SKILLS

Analysis & modeling: SQL, Python (pandas, NumPy, SciPy, scikit-learn, statsmodels), statistics, model validation, hypothesis testing, Monte Carlo
Visualization & reporting: dashboards, KPIs, matplotlib, interpreting and presenting results (Google Data Analytics)
Data engineering: ETL pipelines, API integration, SQLite, data cleaning and normalization, Git/GitHub
Development & automation: TypeScript, JavaScript, React, Node.js, Make, n8n, Vapi
Business: Shopify e-commerce, conversion optimization, digital marketing, project management
Languages spoken: Spanish (native), English (B2)

DATA PROJECTS

futpred — Sports Outcome Predictive Model — Personal project *2026*
Python · pandas · NumPy · SciPy · scikit-learn · SQLite · matplotlib

- Data pipeline from 5+ sources (results, xG, odds) normalized in SQLite; Dixon-Coles statistical model + logistic-regression meta-model.
- Walk-forward validation with **no data leakage across 23,000+ matches**, measured with RPS, Brier score, log-loss and calibration (ECE 0.007).
- On **79 real 2026 World Cup matches it was 65% accurate** and beat an Elo baseline (RPS 0.152 vs 0.164); adding xG improved the club model ($p < 0.001$).
- Monte Carlo tournament simulator and calibration-plot reports; findings documented honestly, including when the model did not beat the market.

Quantitative Research & Crypto Strategy Backtesting — Personal project *2026*
Python · pandas · statsmodels · HMM · GARCH · TypeScript · SQLite

- Designed and tested **4 quantitative hypotheses** (cointegration, HMM regimes, GARCH sizing, on-chain metrics) using walk-forward validation, purged k-fold CV and a single out-of-sample evaluation.
- Implemented professional metrics (deflated Sharpe ratio, drawdown, paired bootstrap) and an experiment log that reports **every result, positive or negative**, to prevent overfitting.
- Built the data capture and analysis system: real-time Coinbase data, decision logging in SQLite and reproducible reports with data and code hashes.
- News sentiment analysis with an NLP model (FinBERT) served as a microservice.

WORK EXPERIENCE

Software Development Intern — PBS Group *Aug 2025 – Mar 2026*

- Validated and integrated APIs and supported system testing, ensuring data flowed correctly across platforms.
- Automated digital processes and built conversational flows with Vapi, Make and n8n.
- Built frontend features with React and updated existing web pages.

AI Data Annotator — micro1 *Remote*

- Critically evaluated large language model (LLM) outputs, flagging errors and inconsistencies with written justifications under strict quality guidelines and deadlines.

ENTREPRENEURSHIP

Founder — Astrobear (Shopify e-commerce store)

- Ran a collectible plush business end to end, from a dropshipping model to in-house production with quality control.
- Tracked and optimized site conversion and social media campaign metrics; a promotional video reached **2.5M+ views**.

EDUCATION

B.S. in Software Engineering — Fundación Universitaria Compensar, Bogotá *In progress · 6th semester (evening program)*

Health Services Administration — Fundación Universitaria de Ciencias de la Salud, Bogotá *Completed*

CERTIFICATIONS & AWARDS

- **Google Data Analytics Professional Certificate (Coursera)**
- **Uber Global Hackathon — Regional Winner**, Uber (Sep 2022)
- CS50: Intro to Computer Science — Harvard (edX)
- Python for Everybody — University of Michigan (2022)
- Java Fundamentals & Database Design — Oracle Academy
- AI Fundamentals — DataCamp (Jan 2024)
- Data & AI Fundamentals — Platzi (Mar 2023)
- Introduction to AI — University of Helsinki (Jan 2023)
